

Zedi TrueChart™

Taking your charts to the next level

Proven technology for accurate data

Zedi TrueChart uses unique technology to provide accurate and efficient processing of chart information. Zedi TrueChart provides a high quality image, with the option of daily records and an enhanced tool set, such as graphical reports for easier data management.

Zedi TrueChart offers the following benefits:

Integrated chart and EFM data on Zedi Access™

- Conveniently view both Zedi TrueChart and Zedi electronic flow measurement (EFM) data in one location - Zedi's secure web portal, ZediAccess.com (formerly Smart-Alek.com)
- Gain faster, easier access to data, regardless of the monitoring device

Enhanced digital features

- Reduce manual errors with electronic, seamless integration of chart data to Zedi's field data capture system, Zedi Vital™
- Graphical reporting makes comparing wells and viewing trends simple
- Flexible support for different file formats for exporting data

Data verification system

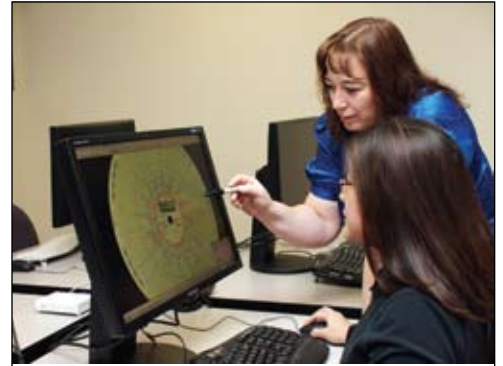

- Unique orifice plate verification system catches and corrects orifice plate errors made by field personnel
- Auto-control verifies and corrects data before calculating gas volumes reducing rework for production accountants

High accuracy from the start

- A combination of high resolution scanning and lossless compression means starting with clearer data to find and interpret more detail
- Our proprietary image analysis software provides the most accurate interpretation of the chart data possible
- Proven technology to adjust for pen lags and arcs on most difficult plunger lift charts

Audits and compliance

- Digitized daily production volumes provide straightforward documentation for audit purposes
- Full audit trail of meter information is maintained and call reports provide a complete history of all work done for a company
- Differentiation between nil production time and actual downtime to provide confidence in accurate marginal royalty calculations
- Explanations of downtime and metering issues are reported along with estimates and prorated volumes to help identify non-compliance risk areas

zedi

Zedi TrueChart™

A service that's true to your business needs

Zedi TrueChart is supported by Zedi's exclusive chart processing customer service team. Each customer is assigned a Customer Service Representative, who becomes familiar with a customer's field and head office staff, operating area and meter info, and procedures and reporting requirements.

Base Functionality

- High quality chart images
- Gas volume statements PDF
- Flow parameter reports PDF

Advanced Functionality

(in addition to base functionality)

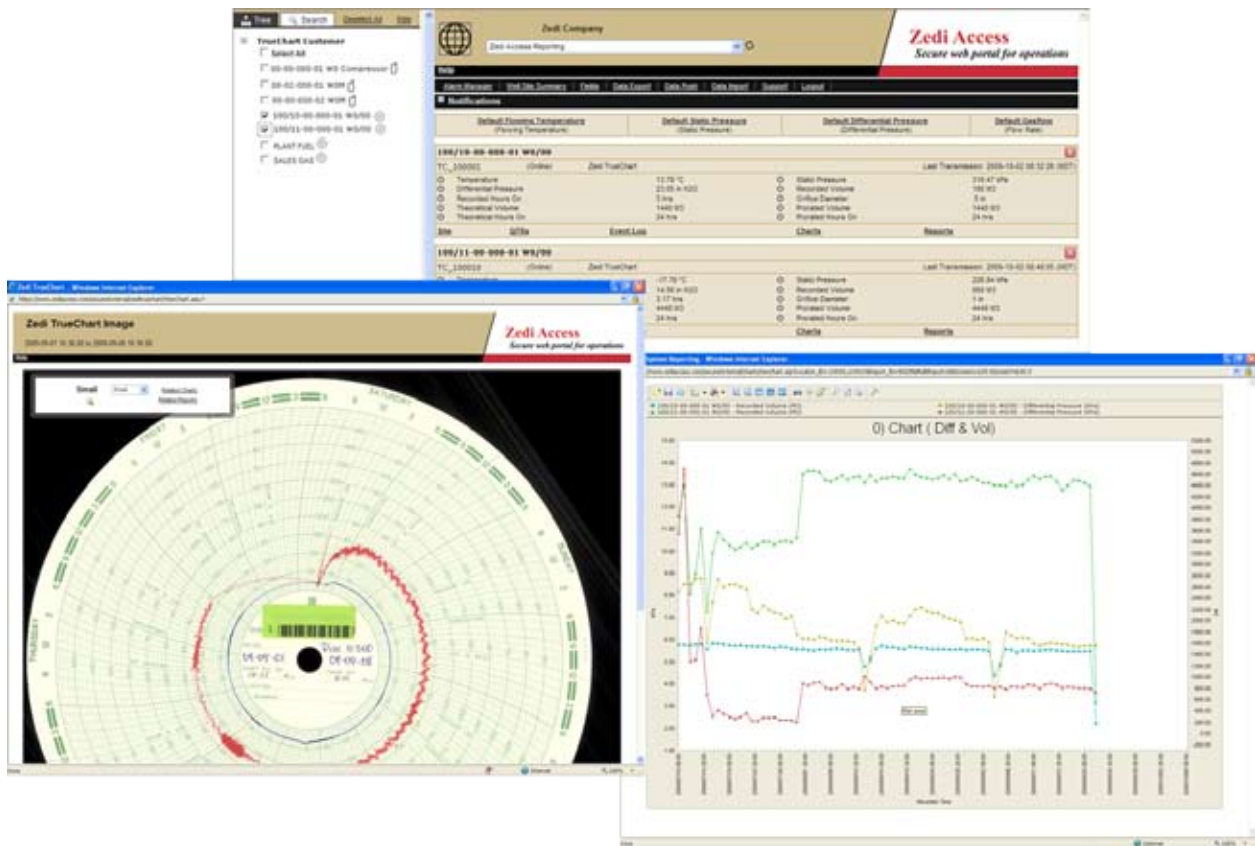

- Daily production volume records
- Graphical trending
- Data exports and reports
- Electronic integration to Zedi's field data capture system, Zedi Vital

Priority Processing

- Zedi's chart processing, using remote scanning, has a quick turnaround time with a custom priority system that processes charts by area to match and meet deadlines.

Joint Ventures

- Allow joint venture partners to view the same online well data. Reduce data requests and build a more effective partner process by providing accessibility to data.

Sample Screen Images from Zedi Access - To view Zedi TrueChart images and reports on Zedi Access, you will require Adobe Acrobat Version 8 or newer.
